May 31 to June 2, 2023

Deictic path in Cantonese

- (1) a. 張三嚟咗 CLA 研討會。

zoeng¹ saam¹ lai⁴ zo² CLA jin⁴tou²wui².

Cheung Sam come PFV CLA conference

'Sam Cheung came to the CLA conference.'

- b. 李四去咗圖書館。

lei⁵ sei³ heoi³ zo² tou⁴syu¹gun².

Lee Sze go PFV library

'Sze Lee went to the library.'

Main proposal

Deictic path elements are special realizations of the prepositional head **Path** (Jackendoff 1983, Svenonius 2010) when its complement is the person projection **πP** (Harbour 2016).

Roadmap

1 Introduction

2 Background

3 Similarities to other directional elements

4 Distinct features of Deictic path

- Relative position of Deictic and Non-deictic elements
- Locative arguments
- Stranding

5 Analysis

6 Conclusion

Deictic path

- Denotes direction with respect to the location of the speaker
- At least semantically, Deixis can be viewed as a special combination of Path (e.g., TO, FROM) and Ground (Talmy 2000, Matsumoto & Kawachi 2020)

Deictic path

- In many languages, Deixis seems to occupy a morphosyntactic slot distinct from Non-deictic Path elements (Lamarre 2008, Matsumoto & Kawachi 2020)

(2) German (Indo-European)
(adapted from Lamarre 2008: 71)

- her-*aus*-tragen**
hither-out-carry
'carry out toward speaker'
- hin-*aus*-werfen**
thither-out-throw
'throw out away from speaker'

(3) Jakaltek (Mayan)
(adapted from Lamarre 2008: 71)

- ten-*il-tij***
hold-out-hither
'pull out toward speaker'
- ten-*ik-toj***
hold-in-thither
'push into away from speaker'

Deictic path in Cantonese

嚟 <i>lai⁴/lei⁴</i>	去 <i>hei³</i>
‘come, hither’	‘go, thither’
venitive	andative
towards speaker location	towards -(speaker location)

Directional elements

Deictic

嚟 *lai*⁴ 'come'

去 *heoi*³ 'go'

Non-deictic

出 *ceot*¹ 'exit'

入 *jap*⁶ 'enter'

上 *soeng*⁵ 'ascend'

落 *lok*⁶ 'descend'

埋 *maai*⁴ 'approach'

過 *gwo*³ 'pass'

Return

返 *faan*¹ 'return'

(Cheung 2007, Yiu 2013)

Both can be standalone predicates

(4) a. 阿明嚟咗圖書館。 [Deictic]

aa³-ming⁴ lai⁴ zo² tou⁴syu¹gun².
ah-Ming come PFV library
'Ming come to the library.'

b. 阿明入咗圖書館。 [Non-deictic]

aa³-ming⁴ jap⁶ zo² tou⁴syu¹gun².
ah-Ming enter PFV library
'Ming entered the library.'

(Yiu 2013)

Both can take locative arguments

(5) a. 阿明嚟咗圖書館。 [Deictic]

aa³-ming⁴ lai⁴ zo² tou⁴syu¹gun².
ah-Ming come PFV library
'Ming come to the library.'

b. 阿明入咗圖書館。 [Non-deictic]

aa³-ming⁴ jap⁶ zo² tou⁴syu¹gun².
ah-Ming enter PFV library
'Ming entered the library.'

(Yiu 2013)

Both can appear after a manner verb

(6) a. 阿明(行)咗(去)圖書館。 [Deictic]

aa³-ming⁴ (haang⁴) zo² (heoi³) tou⁴syu¹gun².

ah-Ming walk PFV go library

'Ming went to the library by walking.'

b. 阿明(走)咗(出)圖書館。 [Non-deictic]

aa³-ming⁴ (zau²) zo² (ceot¹) tou⁴syu¹gun².

ah-Ming run PFV exit library

'Ming ran out of the library.'

(Yiu 2013)

Co-occurrence of Non-deictic and Deictic elements

Manner < **Non-deictic** < **Deictic**

(7) 阿明上咗去(山頂)。

aa³-ming⁴ soeng⁵ zo² heoi³ (saan¹ deng²).

ah-Ming ascend PFV go mountain top

'Ming went up (to the top of the mountain).'

(8) 阿明行咗上去(山頂)。

aa³-ming⁴ haang⁴ zo² soeng⁵ heoi³ (saan¹ deng²).

ah-Ming walk PFV ascend go mountain top

'Ming walked up there (to the top of the mountain).'

Aspectual markers

Aspectual markers attach after the first element in a sequence.

(9) a. 阿明(行)(咗)上(* 咗)去(* 咗)。

*aa*³-*ming*⁴ *haang*⁴ (*zo*²) *soeng*⁵ (**zo*²) *heoi*³ (**zo*²).

ah-Ming walk PFV ascend PFV go PFV

'Ming went up by walking.'

b. 阿明上(咗)去(* 咗)。

*aa*³-*ming*⁴ *soeng*⁵ (*zo*²) *heoi*³ (**zo*²).

ah-Ming ascend PFV go PFV

'Ming went up.'

Optionality of locative arguments

- (10) a. 阿明去咗(山頂)。[Deictic, optional]
- aa³-ming⁴ heoi³ zo² (saan¹-deng²).*
 ah-Ming go PFV mountain-top
 'Ming went (to the top of the mountain).'
- b. 阿明上咗?(山頂)。[Non-deictic, obligatory]
- aa³-ming⁴ soeng⁵ zo² ?(saan¹-deng²).*
 ah-Ming ascend PFV mountain-top
 'Ming ascended to the top of the mountain.'

Three possible interpretations

(Jackendoff 1983, Yiu 2013)

All three interpretations possible

(11) a. 我出咗房。 [source]

*ngo*⁵ **ceot**¹ *zo*² **fong**².

1SG exit PFV room

'I exited from the room.'

b. 我出咗後門。 [route]

*ngo*⁵ **ceot**¹ *zo*² **hau⁶-mun**².

1SG exit PFV back-door

'I exited through the back door.'

c. 我出咗後院。 [goal]

*ngo*⁵ **ceot**¹ *zo*² **hau⁶-jyun**².

1SG exit PFV back-yard

'I exited to the backyard.'

Two interpretations only

- (12) a. 我入咗前便。 [source]
- ngo*⁵ *jap*⁶ *zo*² *cin*⁴-*bin*⁶.
1SG enter PFV front-side
'I entered to the front.' / #'I entered from the front.'
- b. 我入咗前門。 [route]
- ngo*⁵ *jap*⁶ *zo*² *cin*⁴-*mun*².
1SG enter PFV front-door
'I entered through the front door.'
- c. 我入咗房。 [goal]
- ngo*⁵ *jap*⁶ *zo*² *fong*².
1SG enter PFV room
'I entered the room.'

Goal only

(13) a. 我嚟咗學校。 [#source]

*ngo*⁵ *lai*⁴ *zo*² *hok*⁶*haau*⁶.

1SG come PFV school

'I came to school.' / #'I came from school.'

b. 我嚟咗樓梯。 [#route]

*ngo*⁵ *lai*⁴ *zo*² *lau*⁴*tai*¹.

1SG come PFV stairs

'I came to the stairs.' / #'I came along the stairs.'

c. 我嚟咗圖書館。 [goal]

*ngo*⁵ *lai*⁴ *zo*² *tou*⁴*syu*¹*gun*².

1SG come PFV library

'I came to the library.'

Possible interpretations for each directional element

Directional elements	Goal	Route	Source
出 <i>ceot</i> ¹ 'exit', 上 <i>soeng</i> ⁵ 'ascend', 落 <i>lok</i> ⁶ 'descend'	✓	✓	✓
入 <i>jap</i> ⁶ 'enter', 過 <i>gwo</i> ³ 'pass'	✓	✓	
埋 <i>maai</i> ⁴ 'approach',	✓		
嚟 <i>lai</i> ⁴ 'come', 去 <i>heoi</i> ³ 'go'	✓		

Preposition stranding

- Crosslinguistically, locative objects are often introduced by adpositions (Svenonius 2007)
- Prepositional stranding is generally banned in Cantonese (Lam 2013): unavailability of stranding points to adpositionhood

Stranding a single directional element

(14) a. 我去/入過嗰間房。

*ngo*⁵ **heoi**³/**jap**⁶ *gwo*³ *go*² *gaan*¹ *fong*².

1SG go/enter EXP that CLF room

'I have gone to/entered that room before.'

b. [我去/入過 ___i] 嘅 [嗰間房]_i 好大。

[*ngo*⁵ **heoi**³/**jap**⁶ *gwo*³ ___i] *ge*³ [*go*² *gaan*¹ *fong*²]_i *hou*² *daai*⁶.

1SG go/enter EXP GE that CLF room very big

'That room that I have gone to/entered before is very big.'

Stranding the last of a sequence of elements

(15) a. 我行過去/入嗰間房。

ngo⁵ haang⁴ gwo³ heoi³/jap⁶ go² gaan¹ fong².

1SG walk EXP go/enter that CLF room

'I have gone to that room by walking before. / I have walked into that room before.'

b. [我行過去/*入___i] 嘅 [嗰間房]_i 好大。

[ngo⁵ haang⁴ gwo³ heoi³/*jap⁶ ___i] ge³ [go² gaan¹ fong²]_i hou²

1SG walk EXP go/enter GE that CLF room very

daai⁶.

big

Intended: 'That room that I have gone to by walking / walked into before is very big.'

Summary of data

Directional elements	Stranding		Transitivity	Interpretation	Aspectual marking	
	Single	Final			Initial	Non-initial
Deictic	✓	✓	Optional	Goal only	✓	*
Non-deictic	✓	*	Obligatory	Root-dependent	✓	*

Summary of data

Directional elements	Stranding		Transitivity	Interpretation	Aspectual marking	
	Single	Final			Initial	Non-initial
Deictic	✓	✓	Optional	Goal only	✓	*
Non-deictic	✓	*	Obligatory	Root-dependent	✓	*

Generalization #1

Single stranding and initial aspectual marking pattern together → V

Summary of data

Directional elements	Stranding		Transitivity	Interpretation	Aspectual marking	
	Single	Final			Initial	Non-initial
Deictic	✓	✓	Optional	Goal only	✓	*
Non-deictic	✓	*	Obligatory	Root-dependent	✓	*

Generalization #1

Single stranding and initial aspectual marking pattern together → V

Generalization #2

Can take locative arguments, *non-initial aspectual marking → P

Summary of data

Directional elements	Stranding		Transitivity	Interpretation	Aspectual marking	
	Single	Final			Initial	Non-initial
Deictic	✓	✓	Optional	Goal only	✓	*
Non-deictic	✓	*	Obligatory	Root-dependent	✓	*

Generalization #1

Single stranding and initial aspectual marking pattern together → V

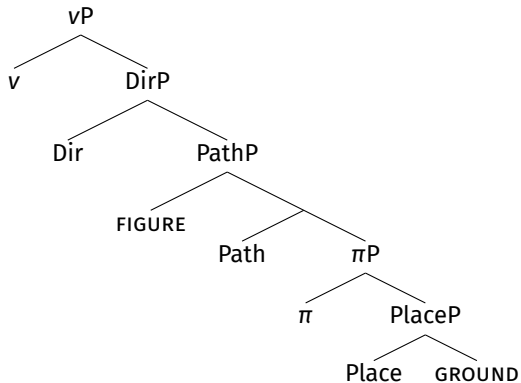

Generalization #2

Can take locative arguments, *non-initial aspectual marking → P

Generalization #3

Final stranding and transitivity pattern together → Deictic inherently has locative

Proposed analysis

(building on Svenonius 2010, Harbour 2016)

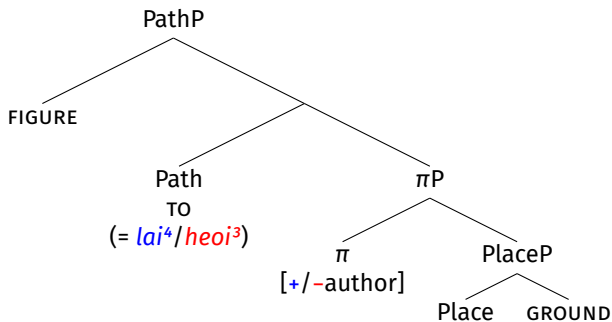

Path introduces locative argument

- Path head requires a locative complement (typically PlaceP)
- Path can be valued as TO (goal), VIA (route), or FROM (source) (Jackendoff 1983), determines the interpretation of the locative
- Path heads usually have phonologically null exponents

Deictic element as special realizations of Path

- Peculiarities of Deictic elements:
 - Locative arguments always interpreted as goals of motion → special exponents of the Path head TO
 - Locative arguments optional → complement of Path is person projection π P (Harbour 2016)

Deictic element as special realizations of Path

- πP defines a region in space defined wrt the speaker through $[\pm\text{author}]$ feature

(16) a. TO \leftrightarrow 嚟 *lai*⁴ 'come' / [_{PathP} – [_{πP} $\pi_{[+\text{author}]}$...]]

b. TO \leftrightarrow 去 *heoi*³ 'go' / [_{PathP} – [_{πP} $\pi_{[-\text{author}]}$...]]

c. TO \leftrightarrow \emptyset (elsewhere condition)

- πP may optionally take PlaceP as a complement; when it does, π acts as a function that restricts the region specified by PlaceP wrt the speaker

Dir as the adjunction site for directional roots

- Dir requires a PathP complement
- It acts as function that picks out a particular set of paths (Svenonius 2010, Troberg 2019)
- Dir is the site of adjunction of Non-deictic roots
- Non-deictic roots introduce selectional restrictions that give rise to the range of possible interpretations of locative arguments associated with Non-deictic elements

Accounting for transitivity

- Dir (which houses Non-deictic roots) and Path are both categorizing heads for P: require complement containing locative argument (Svenonius 2007) and disallow stranding (Lam 2013)
- π P satisfies PathP's requirement, giving the façade of allowing locative omission and stranding

Manner

(17) a. 阿明行咗上去。

aa³-ming⁴ haang⁴ zo² soeng⁵ heoi³.

ah-Ming walk PFV ascend go

'Ming went up by walking.'

b. 阿明上咗去。

aa³-ming⁴ soeng⁵ zo² heoi³.

ah-Ming ascend PFV go

'Ming went up.'

Manner: adjunction to v

- Manner roots may adjoin to v to form the main verb of the clause
- No Manner root: head closest to v moves to v (Hale & Keyser 2002, Sybesma 2017), “recategorizing” the directional element into a verb → permitting stranding and taking aspectual marking
- Requirement of locative complement is kept, which accounts for the unnaturalness of omission of the locative argument

Example

(18) 阿明行咗上去山頂。

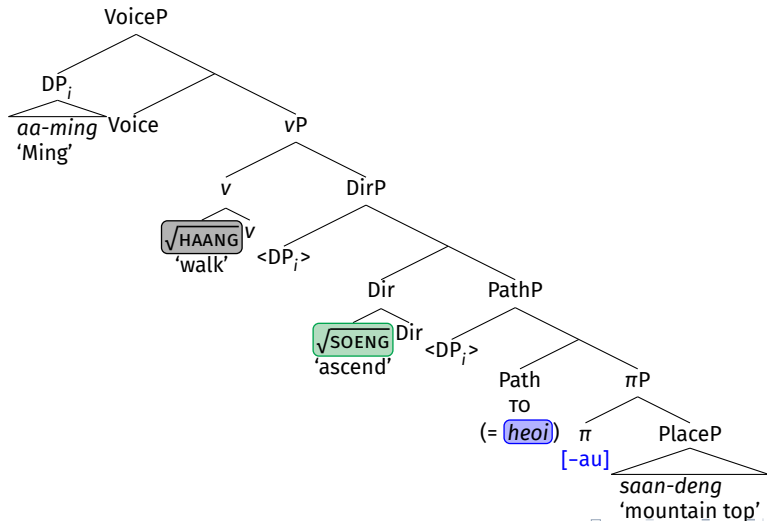

*aa*³-*ming*⁴ *haang*⁴ *zo*² *soeng*⁵ *heoi*³ *saan*¹ *deng*².

ah-Ming walk PFV ascend go mountain top

'Ming walked up there to the top of the mountain.'

Derivation

(19)

Conclusion

- Main proposal: Deixis = Vector + special Ground (Talmy 2000, Matsumoto & Kawachi 2020) is not only semantic, but also morphosyntactic in Cantonese.
- Non-deictic elements specify particular sets of vectors, allowing co-occurrence of Non-deictic and Deictic.
- Challenges existing views on directional elements in Cantonese (and other Chinese languages), which often treat them as inherently verbal and lexical (Matthews 2006, Paul 2022).
- Further work is needed to develop a typological account of deictic directionals.

Return

Maximally:

- **Manner** (of motion): 行 *haang⁴* ‘walk’, 走 *zau²* ‘run’, etc.
- **Return**
- **Non-deictic**
- **Deictic**

(20) 阿明行咗返上去(山頂)。

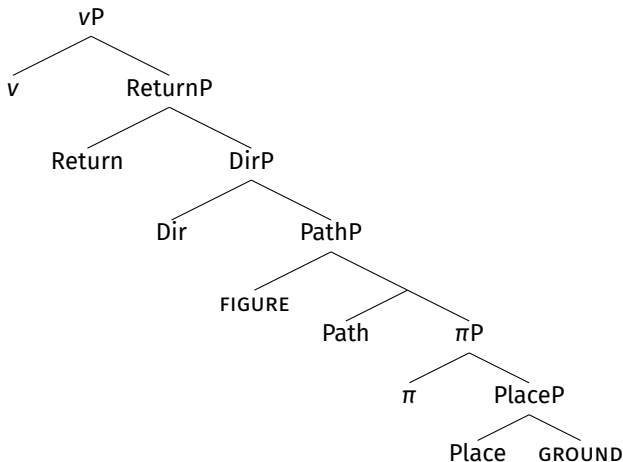

aa³-ming⁴ *haang⁴* *zo²* *faan¹* *soeng⁵* *heoi³* (*saan¹* *deng²*).

ah-Ming walk PFV return ascend go mountain top

‘Ming walked back up there (to the top of the mountain).’

Proposed analysis (with Return)

(21)

Interpretation depends on last element in a sequence

(22) a. 我行咗(返)上水。 [source]

ngo⁵ haang⁴ zo² (faan¹) soeng⁵ sei²
 1SG walk PFV return ascend water
 'I walked (back) up from the water.'

b. 我走緊(返)上斜路。 [route]

ngo⁵ zau² gan² (faan¹) soeng⁵ ce³-lou²
 1SG run PROG return ascend steep-road
 'I am running (back) up the ramp.'

c. 我爬咗(返)上山頂。 [goal]

ngo⁵ paa⁴ zo² (faan¹) soeng⁵ saan¹-deng²
 1SG climb PFV return ascend mountain-top
 'I climbed (back) up to the top of the mountain.'

Interpretation can be ambiguous

(23) 我想`搵``出`多倫多。

*ngo*⁵ *soeng*² `zaa`¹ `ceot`¹ **do¹leon⁴do¹**
1SG want drive exit Toronto

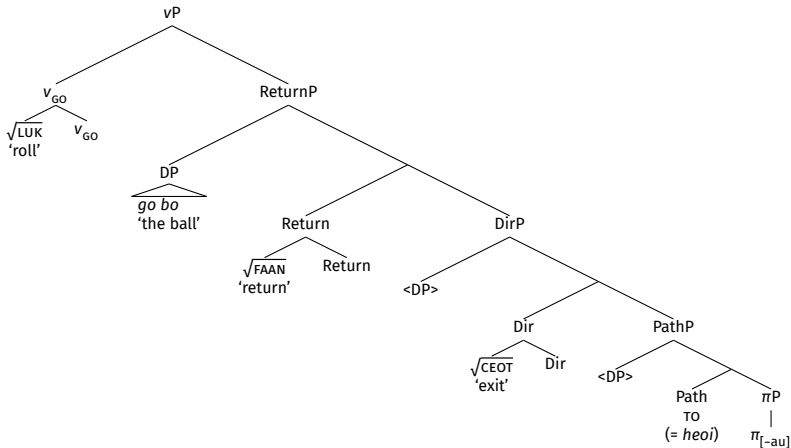

'I want to drive out to Toronto.' (goal) / 'I want to drive out of Toronto.' (source)

Other types of DMCs

- (24) a. 個波轉咗返出去 (球場) ◦ [non-agentive]
go³ bo¹ luk¹ zo² faan¹ ceot¹ heoi³ (kau⁴-coeng⁴).
 CLF ball roll PFV return exit go ball-field
 ‘The ball rolled back out [to a place distinct from the speaker’s location] (to the soccer field).’
- b. 阿明轉咗個波返出去 (球場) ◦ [agentive]
aa³-ming⁴ luk¹ zo² go³ bo¹ faan¹ ceot¹ heoi³ (kau⁴-coeng⁴).
 ah-Ming roll PFV CLF ball return exit go ball-field
 ‘Ming rolled the ball back out [to a place distinct from the speaker’s location] (to the soccer field).’

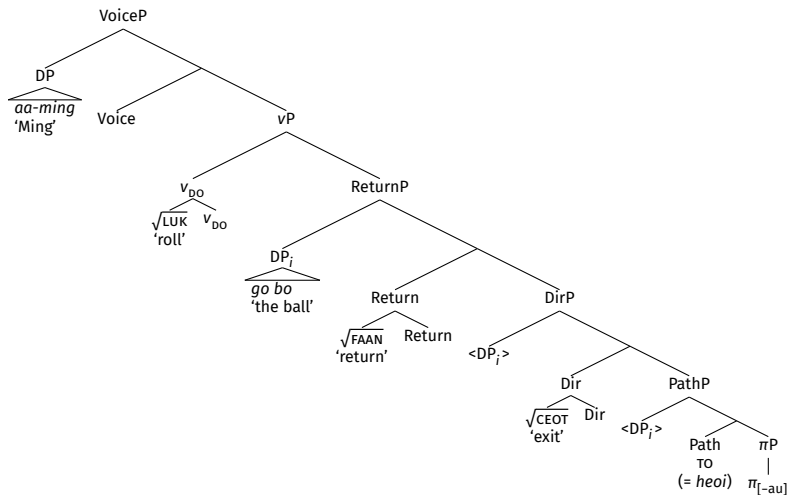

Non-agentive DMC

(25)

Agentive DMC

(26)

Three types of DMCs

Property	Non-agentive	Self-agentive	Agentive
Flavour of v	V_{GO}	V_{GO}	V_{DO}
VoiceP present?	No	Yes	Yes
Position of figure	Spec below v → Spec,TP	Spec below v → Spec,VoiceP → Spec,TP	Spec below v
Position of agent	N/A	Same as figure	Spec,VoiceP → Spec,TP

Mandarin

- In Mandarin, deictic directional elements sometimes do not appear to be low (Hu 2022).

(27) a. 張三拿出了很多書來。 [Mandarin]

Zhāng Sān ná chū le hě'n duō shū lái.

Zhang San take exit PFV very many book come

'San Zhang took many books out.' (adapted from Hu 2022: 62)

b. *張三擺出咗好多書嚟。 [Cantonese]

zoeng¹ saam¹ lo² ceot¹ zo² hou² do¹ syu¹ lai⁴.

Cheung Sam take exit PFV very many book come

Intended: 'Sam Cheung took many books out.'

c. 張三擺咗好多書出嚟。 [Cantonese]

zoeng¹ saam¹ lo² zo² hou² do¹ syu¹ ceot¹ lai⁴.

Cheung Sam take PFV very many book exit come

'Sam Cheung took many books out.'

Abbreviations

1 first person
CLF classifier
EXP experiential
GE nominal linker 嘅 *ge*³

PFV perfective
PROG progressive
SG singular
